You need coins for ignition upgrades. So that's it for now as a BBR2 guide. Let's take a look at our best Beach Buggy Racing 2 tips, tricks and strategies! BEACH BUGGY RACING 2 TIPS AND TRICKS: - 1.) Master The Drift, Powerslide There are two brake buttons; at the bottom left and at the bottom right. You can use these brakes to slide the torgus when you are about to take a turn. It gives the car a temporary boost and helps it spin perfectly. If you've ever played racing games, then chances are you already know it as drifting. All you need to do is tap the brake button while you're spinning. For example: you have to turn left. Next, you will tap the right brake + thumb button on the left side. 2.) Use the driver's skill at the right time In the race, in the upper left corner, you have the driver capacity option. Touching it will activate the special ability. In the game BBR2, all drivers or characters have unique abilities. For example: Mikka has the ability (Monster Munch), which slows down opponents. But if no one is ahead, then using this skill would not be beneficial. So be sure to use the skill at the right time. 3.) Do not fall into the trap If you are going to play this game for a long time, then we recommend that you save the gems and spend them in cars. On the other hand, if you are using these gems on your breasts (to open instantly), then stop! Save gems and invest. Plus, you don't need to spend on challenges. Once the driver has been discovered, he/she will automatically challenge you, keep playing the game and wait for it. Don't miss the opportunity! 4.) Build the best crazy power-up deck You can put up to eight power-ups on deck. Be sure to include the best ones. Go to the Power-ups tab -> tap power -> use -> select the slot. 5.) Take those quick bubbles in the race, you get bubble enhancers. There are three types of bubble: Unique bubble, double bubble and fast bubble. After you get the ignition, wait until it fully charges. The ignition you get from Fast bubble loads faster compared to single and double bubbles. Quick bubbles are highlighted with (i) sign. 6.) Choose The best controls There are three control options available from now on; touch direction, arcade steering and tilt. In touch steering control, you have two brakes on the corners and navigate the car by on the left/right side. In the arcade direction, tap the arrow buttons to navigate and the brake button for drift/power sliding. And, on the tilt controls, you have two brake options on the corners and you navigate the car tilting the device. Choose the control that suits you best. In the end, the controls are in your hand!
